PERSONAL SUMMERY

I'm a versatile and professional person looking to work in a team and collaborate with smart and experienced individuals. I am able to perform well under pressure and get things done right. As during my time in university, I have worked alone and with a team on various interesting projects, now I am very excited to work with a team of great individuals. I keep up with tech news, always eager to learn and know about new tools and tinker with them. I also like solving problems and taking on tough challenges.

EDUCATION

BSc in Computer Science (Graduated in May 2021)
BRAC University

THESIS

Deepfake detection in videos detecting face wrapping using CNNs
Published in BRAC University

PROJECTS

- [python-scripts](): A collection of python projects including image classifiers, ML models for projects, COVID data scraper, OCR screenshots to smart google search for quiz shows and automations etc.
- [lyriCatch](): Cross platform Python app to fetch, show and download lyrics from currently playing song. Supports Spotify and last.fm
- [mac-setup](): App containing a boilerplate for setting up a development machine on a new macOS installation in minutes. Made using Markdown and Docsify. Automated using Bash.
- [reach-wifi-analyzer](): Reach automagically searches and figures out the best WiFi channel for your network avoiding populated channels. Made using Python.
